SUMMARY

Software developer with 5 years of professional experience, primarily focused on backend development with solid frontend expertise. Experienced in designing and developing monolithic and microservice-based systems using Java, Spring Boot, C#, .NET, and modern JavaScript frameworks. Actively contributed to CRM, e-Invoicing, GIS-based stock management, and Web Phone (VoIP) projects in enterprise environments.

EDUCATION

Turk Hava Kurumu University, Electrical Electronics Engineering (ING)

2014 - 2019

WORK EXPERIENCE

Global PBX A.Ş.

12.2024 - 01.2026

Project: Web Phone (VoIP Platform)

[Java 17] [Spring Boot] [React.js] [Redis] [Elasticsearch] [gRPC] [Docker] [Gradle] [RabbitMQ] [Wildfly] [Zabbix]

- VoIP platform — mobile, web & desktop client support
- 3 microservice responsibilities and React.js web frontend maintenance
- RocketChat (WebSocket) instant messaging integration
- Video call integration
- AI chatbot integration

Başarsoft

07.2024 - 12.2024

Project: GIS-Based Stock Management System

[.NET 7] [React.js] [Ocelot] [Oracle] [Docker]

- Meeting room & Vehicle debit management
- GIS based employee location tracking
- Car sharing module between employees on Map
- Microservice architecture with Ocelot API Gateway

KolaySoft

10.2023 - 07.2024

Project: E-Invoicing Systems

[Java 8] [Spring Boot] [React 16] [.NET] [Wildfly] [Zabbix]

- e-Invoice reporting system to Revenue Administration
- .NET desktop application that collects accounting data
- Java/Spring Boot portal backend & React frontend
- 3 projects — REST & SOAP API, PostgreSQL & MSSQL

Etia

11.2021 - 10.2023

Project: TürkTelekom CRM Order Management System

[Java 8] [Spring Boot] [Angular] [JSP] [SOAP] [PL/SQL]

- Maintaining legacy Java SOAP/XML system operating since 2005
- Migrating the Legacy system to Spring Boot REST architecture
- 3 projects — legacy SOAP, Spring Boot backend, Angular frontend
- Oracle PL/SQL development & optimization

Ericcson

02.2020 - 01.2021

Project: TürkTelekom Billing Management System

[Java] [SoapUI] [Postman] [Oracle SQL]

- Automation, Data processing
- Distributed architecture

TECHNICAL SKILL

- **Backend:** Java (SOA Architecture), Java - Spring Boot, .NET Core
 - **Frontend:** React, Next.js, Angular 2.0
 - **Architecture & APIs:** Microservices, RESTful API, SOAP, Clean Architecture, gRPC, Feign Client
 - **Databases:** Oracle, PostgreSQL, MSSQL, PL/SQL
 - **DevOps & Tools:** Docker, Git, Ocelot, RabbitMQ, Redis, Elasticsearch, Zabbix
 - **Other:** WebRTC, SIP/VoIP, Unit Testing, XML/XSLT
-

LANGUAGE

- **English,** Upper Intermediate (B2)
-

PROJECT DETAILS

Global PBX A.Ş.

Web Phone (VoIP Platform)

- Contributed to a large-scale microservice-based Web Phone (VoIP) platform supporting mobile, web, and desktop clients
- Took responsibility for 3 microservices within a broad microservice ecosystem
- Provided backend support across all 3 platform layers (mobile, web, desktop)
- Maintained the React.js web frontend in addition to backend responsibilities
- Contributed to RocketChat integration: WebSocket-based instant messaging module inspired by WhatsApp's communication model
- Took part in video call feature integration within the platform
- Contributed to AI-powered chatbot integration; used Elasticsearch to power chatbot search and response matching
- Used Elasticsearch to filter and process high-volume company-wide search queries efficiently • Inter-service communication via gRPC and Feign Client
- Used Redis for caching; worked with Java 17, Spring Boot, Gradle and Docker
- Reason for leaving: Team was downsized due to organizational restructuring

Başarsoft

GIS-Based Asset & Stock Tracking System

- Contributed to a multi-module asset and stock tracking system with 3 core modules
- Asset Management: Took part in assignment and release tracking for company vehicles and meeting rooms
- GIS Module: Worked on map-based tracking of employee locations and vehicle information using geographic data
- Maintained microservice architecture using .NET 7 with Ocelot API Gateway, fully containerized with Docker
- Worked on React.js frontend
- Reason for leaving: Laid off due to team restructuring.

Kolaysoft

E-Invoicing & e-Transformation Systems

- Contributed to an e-Transformation system integrating client-side invoice data collection with government reporting (GIB)
- Worked on a .NET desktop application installed on clients' machines to capture and transmit accounting/invoice data
- Maintained and extended the portal layer using Java 8 (Spring Boot) and React 16 for processing and managing invoice data
- Took part in reporting and submitting e-Invoice data to GIB (Turkish Revenue Administration) in compliance with legal standards
- Used Wildfly as application server and Zabbix for system monitoring
- Worked with REST & SOAP APIs and PostgreSQL/MSSQL databases across 3 projects
- Reason for leaving: Resigned for personal reasons.

Etiya

TürkTelekom XDSL Sales & CRM Order Management System

- Maintained and extended a legacy Java 1.8 SOAP/XML-based monolithic system (in production since 2005) with JSP pages and stored procedures for TürkTelekom XDSL sales platform
- Took part in migrating the legacy system to modern architecture using Spring Boot (Java 8) and RESTful APIs
- Contributed to an Angular-based frontend application as part of the modernization project
- Worked on 3 projects in total: legacy SOAP system, new Spring Boot backend, and Angular frontend
- Contributed to Oracle PL/SQL development and optimization
- Volunteered in API development using .NET 3.1 for the "Ahbap" NGO project
- Reason for leaving: Resigned for a better opportunity
